GitHub: github.com/omerbag-9

Professional Summary

ISTQB-certified Software Tester and Technical Delivery Manager combining hands-on quality assurance with project management across concurrent software house projects. Experience includes UI and API testing, accessibility, EDI/ERP integrations, and payment workflows. Led a veterinary pharmaceutical platform from inception to production launch, combining testing, development support, stakeholder coordination, and release ownership.

Skills

Software Testing: Quality Assurance (QA), Manual Testing, Functional Testing, Regression Testing, Exploratory Testing, Integration Testing, API Testing, UI Testing, Accessibility Testing, End-to-End Testing (E2E), SQL Testing, EDI Testing, ERP Integration Testing.
Test Design & Automation: Test Planning, Test Cases, Test Scenarios, Defect Tracking, Boundary Value Analysis, Equivalence Partitioning, Playwright, Selenium WebDriver, Page Object Model (POM), Test Fixtures, API Automation.
Tools & Technologies: Postman, ClickUp, Figma, Git, GitHub, TypeScript, JavaScript, Java, SQL, MySQL, MongoDB, React, Node.js, HTML, CSS, GitHub Actions and Continuous Integration (CI) Fundamentals.
Project Management: Technical Delivery Management, Requirements Analysis, Acceptance Criteria, Backlog Prioritization, Risk Management, Release Coordination, Milestone Tracking, Delivery Reporting, Agile, Scrum, Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC).
AI Workflows: AI-Assisted Documentation, AI Agent Skill Development, Prompt-Based Skill Routing.
Professional Skills: Problem Solving, Stakeholder Communication, Cross-functional Collaboration, Ownership, Attention to Detail.

Professional Experience

Technical Delivery Manager / Software Tester
Manage Wise (Orthoplex Solutions), Egypt | July 2025 – Present

- Deliver hands-on QA across 6 client projects spanning healthcare, banking, pharmaceuticals, SaaS, and e-commerce, alongside delivery responsibilities on concurrent assignments.
- Translate business requirements into test cases and acceptance criteria; perform functional testing, regression testing, API testing, and integration testing across different business domains.
- Collaborate with project managers, developers, and stakeholders to prioritize work, resolve blockers, clarify dependencies, and coordinate approvals against release deadlines.
- Use ClickUp for task management and defect tracking; document reproducible issues, verify corrections, and communicate outstanding risks before releases.
- Prepare delivery updates covering completed work, open issues, blockers, and next steps to support project decisions and handovers.
- Apply analytical problem solving to investigate issues and contribute targeted frontend and backend changes alongside developers; take ownership of verification and handover through launch.

Education & Certifications

Bachelor of Computer Science | CHI University, Egypt | June 2025
ISTQB Certified Tester Foundation Level (CTFL)
PMP Exam Preparation Course | In progress
Full Stack Web Development | Route Academy

Selected Client Projects

Client identities and internal implementation details omitted.

Community Mental Health Platform | Canada

- Tested a platform with multiple user roles, complex business requirements, and varied workflows; designed role-based scenarios to validate permissions and expected behavior.
- Combined hands-on testing with delivery management; prepared structured updates for the project manager covering completed work, outstanding issues, and next delivery steps.

Banking Web Interface | North America

- Tested the frontend for a major financial institution serving Canada and the United States, with close attention to UI/UX and Figma design fidelity; reported visual discrepancies as actionable defects.
- Performed accessibility-focused testing for blind and visually impaired users, documenting usability barriers and verifying fixes against project accessibility requirements.

Pharmaceutical Platform | EDI / ERP Integration

- Tested electronic data interchange (EDI) files and data exchange between a pharmaceutical platform and an enterprise resource planning (ERP) system.
- Validated integration behavior and business workflows, reported defects, and retested fixes across the platform and connected system.

Veterinary Pharmaceutical Platform | Delivery Through Launch

- Led a veterinary pharmaceutical platform from project inception to production launch, combining delivery ownership, hands-on QA, and development contributions.
- Coordinated requirements, testing, defect resolution, and release readiness; contributed development fixes and delivered stakeholder documentation to support launch and handover.

Charity and Donor SaaS Platform

- Owned testing for a SaaS platform serving charities and donors, validating user workflows and checking changes for regressions.
- Collaborated with developers to investigate defects, contribute fixes, and verify expected behavior before delivery.

Catering E-commerce Platform

- Tested ordering workflows, payment behavior, and time-zone handling in a catering e-commerce system.
- Investigated defects, supported development fixes, and verified affected workflows through regression testing.

Published AI Agent Skills

Created and published 2 reusable AI agent skills for user documentation and prompt-based skill selection.

User Guides

- Built a reusable skill that generates user guides with screenshots and step-by-step workflows for stakeholders and nontechnical users across projects.

Skill Router

- Built a skill designed to run at session startup and select relevant skills for each prompt to support AI-assisted work.
